4/16/92

Dear Hal,

This indicate my time pressure. And I've been up 15 1/3 hours and it is not yet supertime! And I've other mail and packages to make. But I want to respond to your letter and thank you for the enclosures I've not yet looked at and probably won't until whatever hour beginning perhaps midnight I'm up. I appreciate the information in the letter and the enclosures but I won't respond to all. What I've been doing recently is using a highlighter to tell me what to return to.

I wrote Tikun again and said you do not apply it to yourselves. I understand that the in Hebrew the word means correction. Wrono liked what I sent them (off the top of the head, obviously) so much that he had it retyped. And, of course, I like that! I did not expect to hear from them and as of today, not even an acknowledgement.

For us we are OK, thanks. I was just 79 and day after tomorrow I'll be 80. So, we are lucky and tolerate what troubles we have.

I'm glad you are past the pneumonia and that you got the shot.

I've had arrhythmia for years and the doctors haven't worried about it so I don't. And for 39 years I've not had to. When you refer to medication to thin the blood, is it coumadin? Probably a very low level if it is. I've been on that since 1975. It is, literally, rat poison, and it is a wonderful thing how many it has kept alive and productive. But at high levels, mine, it can be dangerous. (it is sodium warfarin)

I read the Ruby script. Miserably bad! Glad to hear it is not doing well. it shouldn't!

I'd not heard of the medical release document and do not have it.

I finally decided that about the one thing new in Grenshaw's book, the alleged call from LBJ, he is a liar. A letter from Dave Perry today says the same thing. He lied. The rest is Shaw's mishmash of theory over which an occasional fact was wafted and it is Grenshaw's egotrip.

People sure collect trash for which they pay fortunes. I'd not heard of that LHO library card bringing \$12,500!

Barnes & Noble are late with their Warren Report reissue. Wladen had the official GPO Report in hardback for about \$13 for more than a month.

I've only peeked at the enclosures but that peek tells me it cost time and money and I do thank you. The xeroxes these days are much better for me because I have to sit with my legs up and when I first get up I have to take it easy until the ticker ticks a little more often. So, normally I sit and read after washing.

I know someone who is doing a master's thesis on the major media, Mostly the Times and Post and mostly for the first 10 days, if you have anything that could be of use to him. I've told him about the White's deposit at Wisc. He is in Virginia. Heard a few minutes ago that Livingston's High Treason 2 is on the Times best-seller list coming

Best and Thanks Hal
